Recycling Guide

The 3 “Rs”

Reduce - Reuse - Recycle

Reduce:

Limit the amount of waste you dispose of by being conscious and AWARE of what happens with the item after you use it. Think of buying a plastic bottle and instead of buying another one once you’ve finished drinking the liquid inside, refill the bottle with water again. Plastic grocery bags can be used for bathroom trash bags. Each of these examples cut back the amount of material in the waste stream.

Reuse:

Items can be used for other purposes. Donate clothes, furniture, cookware, books, etc., to thrift stores or have a yard sale instead of discarding in trash.

Recycle:

Diverting items away from landfills and making them available to manufacturers who can produce new products out of it. This process saves energy, raw materials, water and reduces the amount of pollution in the air.

Be a part of the cycle! Buy products made of recycled material because you know they have conserved resources. All of this contributes to a better quality of life.
